PROFESSIONAL SUMMARY

- **CCNA-trained** Network Engineer with hands-on experience in Cisco switch/router installation, configuration, IOS upgrades, VLAN/trunk/access port setup, and Layer 2 troubleshooting at enterprise client sites.
- **Network Automation:** Python scripting with the Netmiko library to connect to Cisco switches and routers over SSH and automate configuration and routine management tasks.
- **Wireless Site Survey:** Skilled in Ekahau AI Pro and Sidekick, including predictive, active & passive surveys, AP placement planning, and heatmap reports.
- Skilled in structured cabling, rack mounting, BOM verification, and NOC coordination with minimal downtime; experienced in ticket resolution and clear communication under pressure.
- Worked at multiple enterprise client sites (banking and corporate offices), handling device replacement, connectivity testing, and site documentation.
- Built self-developed tools (AP Tracker web app and mobile barcode scanner) that reduced manual paperwork and sped up site reporting.
- **AWS Certified Cloud Practitioner** with working knowledge of networking and Linux.
- Seeking a Networking / NOC / Support role involving end-to-end network services.

TECHNICAL SKILLS

Networking: Switch & Router Config, VLANs, Trunk & Access Ports, IOS Upgrades, TCP/IP, OSI Model, Subnetting, DNS, DHCP, SSH & Telnet, Console Access.

Wireless & Site Survey: Ekahau AI Pro & Sidekick, Wi-Fi Heatmaps, AP Placement, Channel Planning, Survey Reports.

Hybrid Infrastructure (Linux, Windows, Cloud): Windows & Linux OS Installation & Administration, AWS EC2, S3, IAM, VPC, RDS, Elastic IP, Security Groups, CloudWatch

Languages & Tools: Python, PHP, SQL, JavaScript, HTML, CSS, Bash, Git & GitHub, MySQL, VS Code, XMAPP, AI Tool Fluency.

CERTIFICATIONS

- Cisco Networking CCNA
- Cyber Security - NASSCOM Gold
- AWS Certified Cloud Practitioner
- SQL & Python - HackerRank

WORK EXPERIENCE

Konverge Technologies | Bengaluru, Karnataka *Apr 2026 - Present Network Engineer(Intern)*

- Installed and configured Cisco switches and routers, performed IOS/firmware upgrades, and configured VLANs, trunk and access ports.
- Troubleshot Layer 2 issues via ping/VLAN/interface validation; performed rack mounting, structured cabling, and network device replacement at enterprise client sites, minimizing downtime.
- Conducted Wi-Fi site surveys with Ekahau AI Pro and Sidekick at enterprise offices - scaled floor plans, walked survey paths, and collected RF data to find coverage gaps and interference.
- Generated Ekahau heatmaps (signal strength, [SNR]Signal-to-Noise Ratio, channel overlap, data rate) and client-ready reports with AP count, placement, and channel/power recommendations.
- Verified BOM and hardware, provided remote console/SSH access to senior engineers, and coordinated with NOC teams for testing.
- Built an AP Tracker web app and mobile barcode scanner to log Wi-Fi AP serial numbers, MAC addresses, and install status.

Medini Technologies | Bengaluru, Karnataka *Oct 2025 - Dec 2025 AWS Cloud Intern*

- Deployed multi-tier web applications on AWS (EC2, S3, RDS, Elastic IP) and designed VPC architecture achieving 99% uptime; earned AWS Certified Cloud Practitioner during internship.
- Implemented IAM roles and least-privilege policies; earned AWS Certified Cloud Practitioner and AWS re/Start Graduate certificate.

PROJECTS

AP Tracker & AP Barcode Scanner *Live at hilton.gt.tc | 2026*

- Built a live PHP/MySQL web app to track Wi-Fi AP installation room-by-room during a hotel rollout, replacing spreadsheets.
- Designed a live dashboard showing completed, pending, and remaining rooms for instant rollout visibility.
- Built a mobile barcode/QR scanner (BarcodeDetector API) to read AP serial and MAC labels, with regex validation and PDF export.

Enterprise Wi-Fi Site Survey & Heatmap Analysis (Ekahau) *2026*

- Ran predictive and passive Ekahau surveys; produced coverage, SNR, and channel overlap heatmaps and AP/channel tuning recommendations.

Enterprise Network Design Projects (Cisco Packet Tracer & EVE-NG) *2026*

- Designed and simulated various enterprise network projects in Cisco Packet Tracer and EVE-NG using routing and switching technologies, and automated device configuration over SSH with Python and Netmiko.

EDUCATION

Rao Bahadur Y Mahabaleswarappa Engineering College 2021 - 2025

Bachelor of Engineering in Computer Science and Engineering | Ballari, India CGPA: 7.23
